Re: **Ex Parte Meeting – CC Docket No. 94-102**
In the Matter of Revision of the Commission's Rules to Ensure Compatibility
Enhanced 911 Emergency Calling Systems

Dear Ms Dortch:

On September 25, 2002, Stephen Meer, CTO and Martha Jenkins of Intrado Inc., (Intrado) met with Barry Ohlson, Joel Taubenblatt and other members of the Wireless Communications Bureau to discuss issues related to the implementation of Wireless Enhanced 911.

Intrado discussed the current status of E911 deployment, the concerns surrounding that deployment with regard to E2 interface standards and the challenges presented by the incumbent legacy network. Intrado stressed that effective wireless E911 requires productive, timely and efficient relationships among the wireless carrier, the ILEC and the PSAP. These critical interrelationships require interconnection, cooperation and operational readiness among the various stakeholders. Intrado also discussed briefly non-traditional technologies such as telematics and other non-initialized technologies that may require FCC intervention and broad policy to avoid challenges such as those presented by Phase I and II deployment.

Very truly yours,

/s/
